MADE4NET

The Industry's Most Adaptable and Configurable Supply Chain Execution Solution

Made4net is a global provider of best-in-class, cloud-based supply chain execution and warehouse management solutions for organizations of all sizes to improve the speed and efficiency of their supply chain. Our end-to-end SCExpert™ platform offers a robust WMS solution that enables real-time inventory visibility, labor management, and equipment productivity with performance analytics that drive faster, more accurate order fulfillment and improved supply chain efficiency. In addition to the best-of-breed WMS, the platform offers integrated yard management, labor, dynamic route optimization, last mile and warehouse automation solutions that deliver a true supply chain convergence.

Why choose Made4net?

Global Expertise
Proven solution with 800 customers in 30 countries and 20 languages

One-Size-Fits-All
Scalable and configurable to match the needs of companies of all sizes

Centralized Technology
Manage all warehouse complexities, including MHE, automation and robotics

Supply Chain Convergence
Fully integrate warehouse, yard, dynamic routing, proof of delivery and warehouse automation solutions
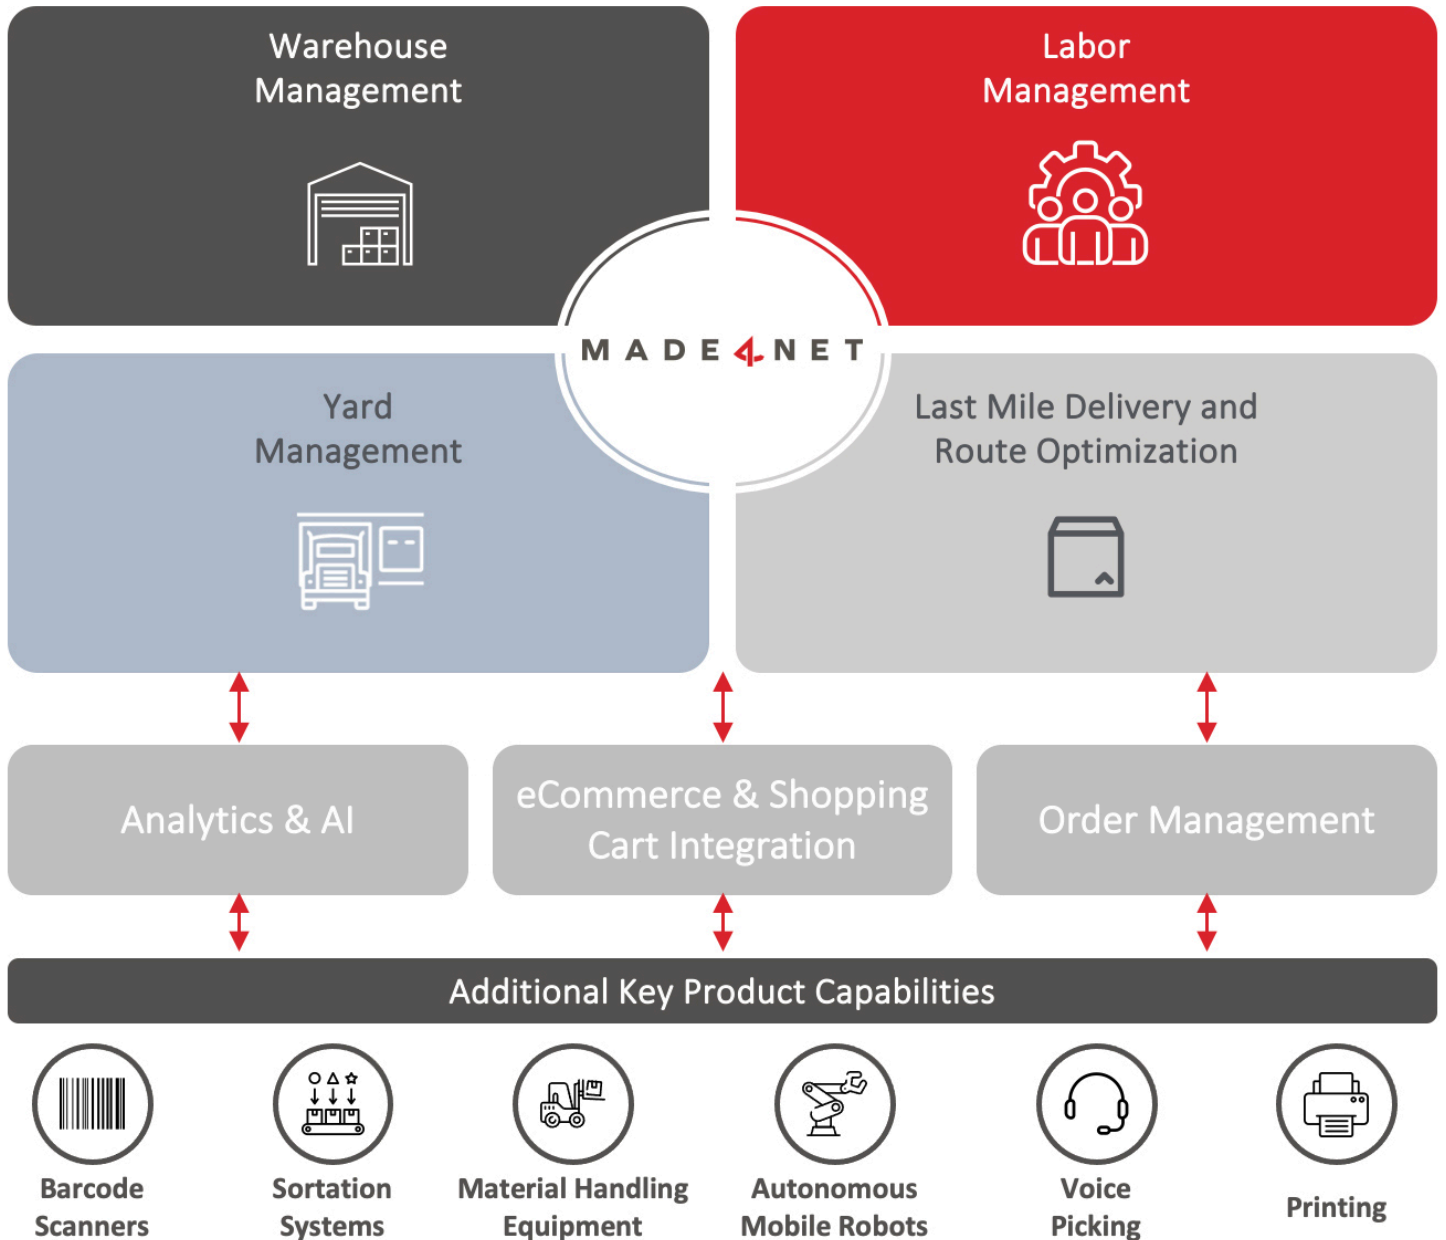

Rapid Deployment
Cost-effective implementation and a flexible, personalized, rules-based platform.

Industry Recognized
Named on the Gartner Magic Quadrant for WMS, 9 straight years

Purpose-Built Software Platform

Warehouse Management

Labor Management

MADE4NET

Yard Management

Last Mile Delivery and Route Optimization

Analytics & AI

eCommerce & Shopping Cart Integration

Order Management

Additional Key Product Capabilities

Barcode Scanners

Sortation Systems

Material Handling Equipment

Autonomous Mobile Robots

Voice Picking

Printing

SCExpert is one of the most advanced and versatile platforms on the market today. Available in the cloud or on-premise, our all-in-one suite of warehouse, transportation, labor, yard management and Last Mile Delivery solutions can be individually deployed, modified or combined as needed, depending on your requirements. And, all of our platforms and modules work seamlessly with whatever backend systems you use.

Our fully integrated end-to-end solution includes Warehouse Management, Labor Management, Yard Management, Transportation Management and Proof of Delivery solutions.

Warehouse Management

WarehouseExpert™ & Synapse 3PLExpert™ offer powerful core WMS functions alongside advanced features like cartonization, task interleaving, optimized scheduling, labor management, cycle counting, and more. Boasts a configurable design based on Microsoft technology and a rules-based platform for easy customization. Scalable to fit organizations of all sizes and complexities, including those with MHE, automation, and robotics. Fully integrated across the supply chain promoting operational efficiency and true supply chain convergence.

Appointment Scheduling

AppointmentExpert™ enables carriers to efficiently schedule their arrivals online, mitigating congestion at the gate, yard overcrowding, receiving capacity constraints, and driver wait times. Tailored time slots are generated according to the company's specific needs and criteria. Once an appointment is confirmed, all essential electronic documentation is provided, expediting the entry of trucks through the gate and the processing of freight onto the warehouse floor.

Labor Management

LaborExpert™ goes beyond the ability to adapt to engineered standards and helps companies actually improve standards and calculate productivity goals based on key factors like available personnel, fatigue, and delay allowances. Warehouse mapping, real time dashboards, and system-calculated task times support taking labor management to the next level.

Route Optimization

RoutingExpert™ powerful and dynamic route planning solution uses advanced routing algorithms and unlimited flexible user-defined business constraint rules to plan smarter routes faster. The system takes into account both the bottom line and customer satisfaction to cut costs and time to delivery.
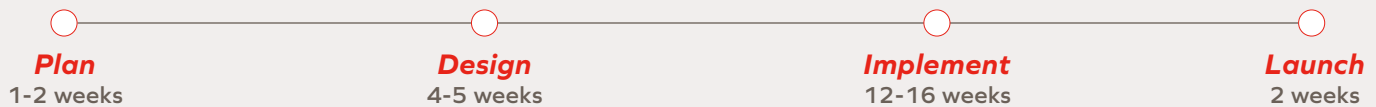

Yard Management

YardExpert™ extends end-to-end visibility beyond warehouse confines, enabling companies to monitor their yard inventory and streamline shipping and receiving operations. Offers all tools required for tracking and managing yard activities to facilitate informed decisions regarding asset movement and personnel assignments.

Last Mile Delivery

DeliveryExpert™ streamlines every aspect of the delivery process, including scheduling, tracking, verification, and data collection. Monitor fleet movements and automatically record delivery details, plus gain real-time dashboard updates and AI-driven Estimated Time of Arrivals for seamless tracking and management of deliveries.

Faster & Easier to Deploy

Our PIVOT accelerated implementation process starts with our flexible, rules-based platform, which was built on Microsoft technology and service-based architecture. Our solutions provide faster time to value with these features:

- A host of specific product features and best practices accelerate every phase of implementation.
- Jumpstart training sessions expedite the design phase.
- Proven, industry-specific templates ensure customers don't have to start from scratch.
- Workflow-based applications allow implementation teams to configure rather than code, shortening the path to launch.
- Cloud-based or on-premise deployment model.
- Dashboard wizards, screen generators and a visual workflow to define scenarios and employ "this then that" methodology.

Plan	Design	Implement	Launch
1-2 weeks	4-5 weeks	12-16 weeks	2 weeks

Customer Success
Trusted by 850 customers in 30 countries

MADE4NET

Made4net is a leading global provider of best-in-class, cloud-based supply chain execution and warehousen management software for organizations of all sizes to improve the speed and efficiency of their supply chain. In addition to their industry renowned **WarehouseExpert WMS**, the platform offers modular components like integrated yard management, dynamic route management, proof of delivery, labor management and warehouse automation solutions that deliver true supply chain convergence.

Contact the experts at Made4net to learn how our supply chain solutions can help you overcome your supply chain challenges.
