CartonCloud.com

Grow your logistics business with CartonCloud

Powerful and easy-to-use cloud-based logistics management software for SMBs. From order to dispatch and everything in between — you can do more with less, with CartonCloud.

END-TO-END MANAGEMENT FOR:

Third-Party Logistics

Transport Companies

Warehouse & Distribution

Last-Mile Shipping

Our feature-rich software is designed by logistics people, to simplify everyday life in the logistics industry through workflow optimization, automated data entry and management, software integrations, and easy-to-use applications.

CartonCloud's logistics management software was initially created from inside a logistics company to remove manual workload and automate business processes.

CartonCloud is now used by over 400 companies worldwide to boost their workforce efficiency, increase daily output, reduce overheads, take on more business, and delight end customers.

Optimizing daily tasks and workflows from end-to-end, letting you do more with less.

> *It's given us the ability to get as big as we can... it's a no-brainer!"*

EMILY HARRIS
Owner, Motus Transport

Let CartonCloud do the heavy lifting for you

AUTOMATED DATA ENTRY

Do away with paper-based processes and spreadsheets to boost workforce productivity, accuracy, and efficiency.

Our software integrations enable seamless data flow between CartonCloud and your customers' software applications.

"*CartonCloud is an amazing platform, has saved us countless hours of admin work, and streamlined our business to no end.*"

JUSTIN KENNON - Owner, Outrayjus Warehousing & Distribution

LEADING IMPLEMENTATION & SUPPORT

We'll be with you each step of the way, to ensure your account is set up based on your specific needs, services, and customers.

Our implementation and support team are logistics people just like you.

"*We started rolling out CartonCloud, and the training behind that has been a matter of hours. Within a day, the team were all over it, and they knew what they were doing.*"

RYAN THOMSON - Operations Manager, Liquex Logistics

AUTOMATED INVOICING

Let CartonCloud take care of invoicing for you. Save hours on admin and get paid faster with automated invoicing, accounting software integrations, automated rate card calculations, and electronic PODs.

"The program itself talks to your accounting software, in the background CartonCloud is doing all of the invoicing for you. I wake up, I know what I'm doing, I know the charges are captured and I know it's correct."

ADAM BOOTH - Hotham Freight

5 STAR RATING

MODERN TECHNOLOGY

- Native apps for both Warehouse and Transport
- True cloud-based
- Unlimited users and customer portals
- Train your team in minutes, not days

The **WMS mobile app** gives staff the tools they need to ensure stock level accuracy, track stock movements, and complete order fulfillment with ease and accuracy.

The **TMS driver mobile app** lets drivers check off consignment items as they are loaded, optimize delivery routes, send ETA text messages ahead of arrival, and when authorized, edit consignments on-the-go (to record weighbridge units or changes in orders at pick up).

"CartonCloud can interact with other systems, and data can flow. For our customers, they want visibility, they want to know where their freight is, where their assets are in real-time, and the system provides that."

PETER McDOUGALL - Macknsons Transport

Our customer success is what drives us

"Highly recommend CartonCloud. They become more of a partner than a service provider. The software is easy to use and intuitive, whilst also providing great depth and capability. Support team is very quick to assist with any questions, or issues."

TANYA BIANCOTTI
Corporate Advisor, Chillfreeze Logistics & Storage

"Just from a simple cost perspective, with CartonCloud we've been able to redistribute our staff and what they are doing to other areas, so we're saving between 40-60 hours a week on admin, but doing 30-50 percent more work. You have the time and money you've saved there, plus the ability to invoice our clients in a more timely fashion, it's had a huge impact on the business."

RYAN THOMSON
Operations Manager, Liquex Logistics

"It saves on costs, it saves on having to employ more staff, because if I didn't have this system, I'd need two additional admin people with me - there's no way I'd be able to do the volume of work we do without it. Being able to finish like a normal person, at 5pm, we've done all the allocating, all the paperwork for the next day, you can't put a price on that."

EMILY HARRIS
Owner, Motus Transport

"Our turnaround time when bringing a new client onboard can be really quick because we have this great system in place. The first thing we do when onboarding a client is to get them set up in CartonCloud and integrate our systems together. We can actually give them access too, to see their stock levels in the warehouse, and see orders being placed (through Shopify) and processed.

Having CartonCloud come on board has been one of the best decisions we could have made, and without it, I don't think we could have won as much business as we do."

DEANNE LUKE
Founder, Lexington Logistics

4.

> *One of the things I really like about CartonCloud is that the team comes from a logistics background. They've seen the operational difficulties from day-to-day and they have created a product that was actually able to help us."*

MATT NORTON
BDM, TNS Logistics

> *People are much happier to come to work, knowing that we're running in an efficient way. Our staff are satisfied, our clients are really happy, and, looking back, we wouldn't have been able to achieve what we've been able to in the last 12 months, without having the software there."*

RYAN THOMSON
Operations Manager, Liquex Logistics

> *It would save us 30-40 hours a week, it pays for itself very quickly."*

PETER McDOUGALL
Owner, Macknsons Transport

> *The BEST cloud WMS you can get on the market. Lots of features, easy to use design, powerful tools, cost-saving and spectacular customer service."*

GILBERTO AVILA DE BENEDICTIS
CEO, Ebba

> *We've managed to streamline our logistics so that when we're doing deliveries, we get proof of deliveries signed electronically, and they instantly get emailed to the customer which gives them the confidence knowing it's been delivered on time, on temp, when they want it to be."*

TOM COYLE
General Manager, APF Cold Storage

> *CartonCloud has made our warehouse so much more efficient. The interface is by far the most user-friendly software of its kind that we have seen. The system's transparency for customers has also won us new business. Not to mention that the transition into CartonCloud was also made seamless thanks to the team's support."*

NICOLE BRUCE
CEO, Hoxton Industries

SIMPLIFYING COMPLEX LOGISTICS

Features designed for the logistics industry.

Automated Data Entry

- Easy and flexible software integrations.
- Open API, public Zapier, self service keys.
- Range of other EDI options.

Mobile Scan Pick & Pack

- Barcode scanning for paperless, efficient and accurate warehousing.
- Native on both iOS and Android.
- User friendly, modern UI for quick training and staff adoption.
- Provide real-time updates to managers and customers.

Accurate & Fast Cross-Docking

- View incoming shipments and allocate freight before it hits the dock.
- Easy and flexible barcode scanning to accurately track freight.
- Automatically calculate all handling, storage and accessorial charges.
- Effectively consolidate outgoing freight for efficient dispatch.

Transport Allocation & Dispatch Management

- Configure rules for automating job sorting and routing for maximum efficiency.
- View delivery run capacities to manage allocations.
- Track delivery run progress.

Easy-to-Use Driver App

- Driver app (iOS and Android) optimizes delivery runs for the most efficient route, with in-app driver navigation.

- Drivers can edit consignments to include weight or delivery changes on the move, and send text ETA to customers for streamlined delivery.

- Drivers can record electronic PODs with sign-on glass for faster invoicing, add delivery information and capture images to attach to the POD.

Automated Invoicing

- Simplify invoicing and get paid faster.

- Automate rates for both WMS & TMS onto a single invoice.

- Push invoices directly to your accounting software (like Xero, MYOB, and Quickbooks) and email customer invoices with all supporting documents.
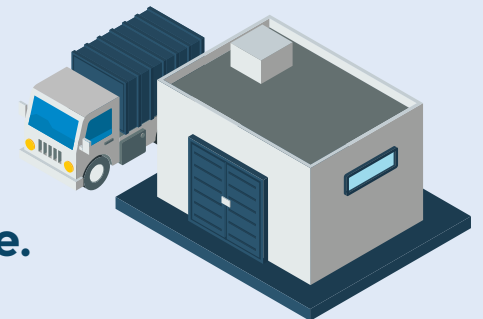

Reporting & Visibility

- Configurable and exportable reporting for managers & customers.

- Embedded Business Intelligence Dashboard.

Customer Portal

- Allow your customers to log in to manage and view orders and run reports in real-time.
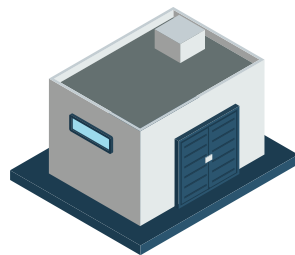

- Unlimited customer logins.

End-to-end warehouse and transport management software.

Warehouse management, automated.

Manage all of your day-to-day complexities with an intuitive warehouse management system.

STREAMLINE PROCESSES, INCREASE ACCURACY, AND REMOVE PAPERWORK

We're logistics people too, and we've worked alongside logistics companies to create an effective warehouse management system designed to simplify your operations, end to end. Keep track of stock, minimize pick errors and optimize operations across the board.

With CartonCloud's Warehouse Management System (WMS) you can simplify your operations and increase accuracy, provide a better experience for your customers, streamline data input with integrations, and eliminate revenue leakage.

BARCODE SCANNING

With CartonCloud, your warehouse staff are operating off tablets or mobile devices where they can receive orders instantly, use the barcode scanning to confirm stock, and track inventory around the warehouse.

With powerful features like scan move, wave picking and replenishment, give your team the tools they need in the palm of their hand.

FLEXIBLE CUSTOMER RULES

Control and manage business logic, inventory attributes, workflows and charging information at both the product and customer level.

Ensure you are capturing the right information for your customers at every step of the warehousing process.
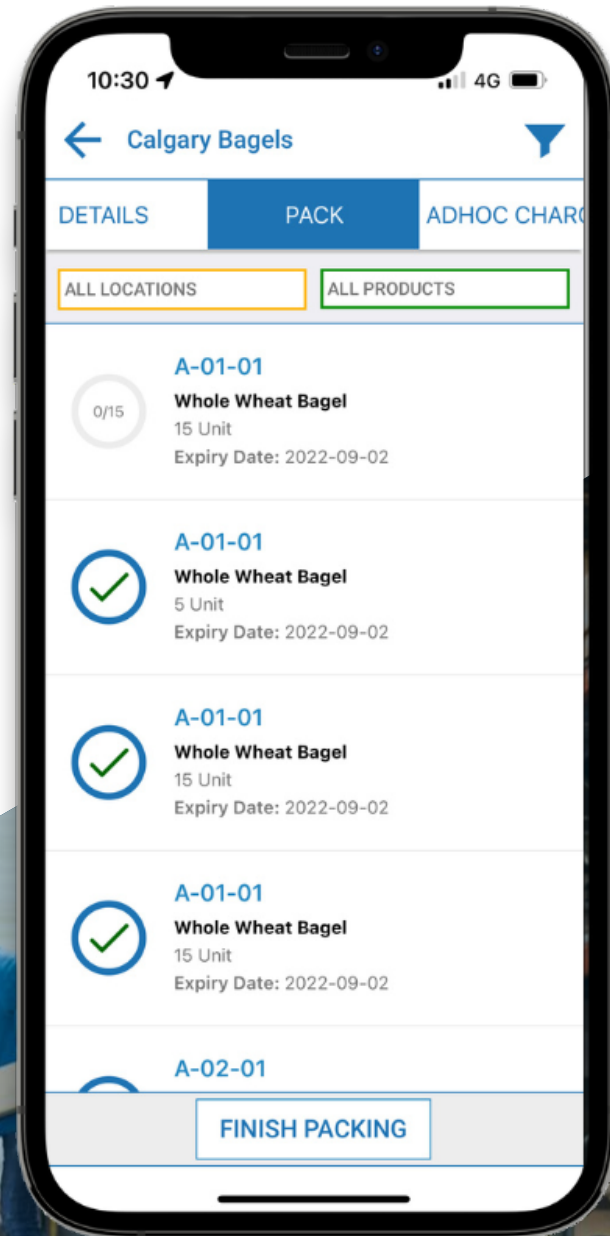

TRACEABILITY & REPORTING

Enhance visibility by tracking stock levels and movements, and allow your customers to generate reports in real-time via the 24/7 customer portal.

AUTOMATED INVOICING

Remove paperwork and manual data entry to streamline your entire warehouse operation and reduce admin overheads.

CartonCloud automates even the most complex rate card calculations to automatically generate invoices as you sleep. Get paid faster, and never miss a charge again.

Transport management, made easy.

Manage all of your day-to-day complexities with a simple transport management system.

SIMPLIFY COMPLEX LOGISTICS, FROM END-TO-END

CartonCloud automates job creation by having clients book jobs online or simply email jobs directly to CartonCloud, where the system will sort and build your runs to easily allocate jobs to your drivers and carriers. Capture electronic PODs (ePODs) with smartphone devices and sleep knowing your invoicing is automatically calculated by CartonCloud and pushed directly into your existing accounting software (Xero / MYOB / Quickbooks) once the job is completed.

ACCURATE CROSS DOCKING

View incoming shipments before they arrive and build outbound loads for faster turnaround times on incoming freight.

ELECTRONIC PROOF OF DELIVERY

Capture signatures on glass, and allow drivers to add photos to ePODs with delivery comments, saved in the cloud for easy, instant access.

AUTOMATED DATA ENTRY

Import jobs automatically with our simple out-of-the-box integrations, automate client CSV/XLS files, or even API / EDI. For smaller volume orders, your clients can also create orders via online access to their customer portal!

EASY DRIVER ALLOCATIONS

Let CartonCloud take the headache out of your allocations and speed things up in the process. Automatically break down your allocations by region and have your delivery runs built for you.
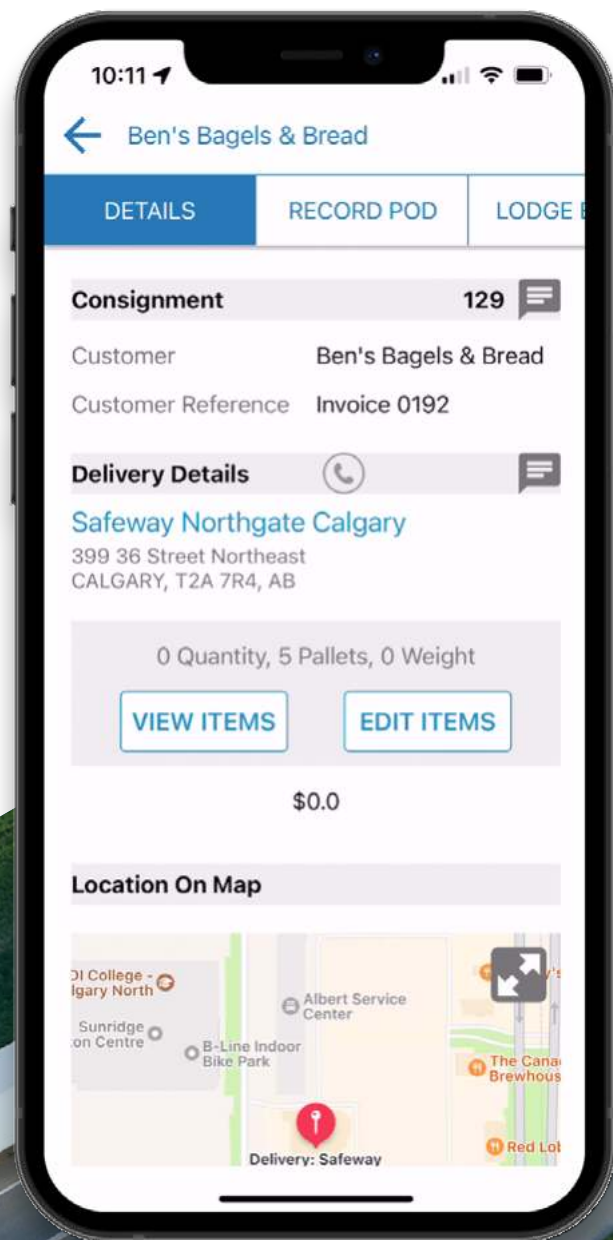

AUTOMATE COMPLEX RATES

Load in your most complex rate cards, seamlessly integrate with your accounting platform, and let CartonCloud take care of the rest. The system will calculate your rates for you, generating invoicing automatically, so you never miss a charge, and can get paid faster.

UPDATE CONSIGNMENTS ON-THE-GO

Enable drivers to adjust consignment information (eg recording weight, updating quantities) on the go to improve autonomy, improve accuracy and ensure you aren't missing out on any revenue.

What to expect...

We are logistics people too, which means we speak your language.

Commitment to Customer Success

Logistics operations can be complicated, and we know each business and operation is unique. Our first step is to get in touch and learn more about your business, customers and operations through a short discovery call to ensure our product is the right software for your company.

Our implementation team are all experienced logistics operators who spend time getting to know your business in depth and training you and your team to get the most out of CartonCloud.

Access the Latest Technology

The best thing about using a modern, cloud-based platform is access to free updates and new features, released every week without any action required from you or your team.

Flexible SaaS Pricing and No Lock-in Contracts

CartonCloud is built for SMB logistics companies, with scalable options to suit your operations at each stage of your growth.

Unrivaled Customer Support

Our local support staff have a wealth of logistics knowledge and hands-on experience to ensure you get the most from your system at all times. They will guide you through CartonCloud to get up and running as quickly as possible and are only a click or phone call away if you have any questions.

Our customer service is second to none. We're consistently given five-star ratings for our customer support and continue to increase the ways we can help our customers succeed every day.

Our flexible plans start at just $99/week, pay as you go, so you only pay for your usage.
