

Automate HS code classifications

Classify your catalog easily with only a description or image.

Simple, fast, and accurate 6 and 10-digit HTS code classifications with our Classify API or HTS lookup tool. Includes image recognition and bulk uploads!

Backed by the international Zonos Global Trade Content and Decoder teams

Our technology is powered by:

- Machine learning
- Image recognition
- NLP (natural language processing)

Zonos has reinvented HS code classification

Standard HS code classification has always required a human, making it expensive, time consuming, and inaccurate. Humans and other classification programs get HS codes wrong 30% of the time. Zonos is changing the industry with our machine learning classification tool that generates instant, accurate results.

Classify your products 3 ways!

</> API

Automate HS code requests!

Integrate with the Classify API to dynamically harmonize your catalog, also for use in ecommerce prior to or during the checkout process.

👕 HS code finder

First 5 classifications free!

Classify your items with just a description or image with our online classification tool! Perfect for when you need a quick HTS code for an item shipment or customs quote.

📁 Bulk upload

Harmonize your entire catalog!

Classifying your product catalog has always been time consuming and expensive. Our bulk upload feature lets you upload products as a CSV file and get back HS codes.
