

Built from the Ground Up for Rapid Speed-to-Pivot

WarehouseExpert provides unmatched flexibility and configurability for your ever-changing supply chain needs

As warehousing has become more complicated, companies are facing new challenges like labor shortages, capacity crunches, inventory control issues, and many more. **WarehouseExpert™**, Made4net's dynamic, real-time WMS helps companies like yours overcome those challenges through improved processes and better visibility.

WarehouseExpert is built on an advanced service-based architecture that enables maximum configurability through our simple rules-based platform for adaptability and scalability, providing seamless integrations, optimized labor and end-to-end visibility for real-time inventory control.

Key Capabilities:

Made4net's core WMS product, **WarehouseExpert**, has been tested and approved by customers of all sizes, and recommended by leading industry consultants and analysts, including Gartner.

- Powerful core WMS functions, plus advanced WMS features, including cartonization, task interleaving, optimized scheduling, labor management, cycle counting and more.
- Configurable solution that is easy to customize due to a flexible, rules-based platform, built on Microsoft technology and a service-based architecture.
- Scalable to meet the needs of organizations of all sizes and complexities, including complex facilities with MHE, automation and robotics.
- Fully integrated end-to-end solution for true supply chain convergence, including WMS, WCS, YMS, Labor, TMS and Proof of Delivery.
- Built to support multi-client (3PL) operations – all business processes and rules are client-driven.
- E-commerce enablement for optimized multi-channel distribution and seamless integration with technology, including voice, vision, IoT, shopping carts and carriers.
- Optimal User Experience / UX – users can personalize their working environment with custom screens, dashboards and workflows.
- Configurable workflows that are driven by business attributes, including fixed and variable attributes, such as item, customer, vendor, location, lot, expiration date, serial, size and color.

Real Results:

AT LEAST
20%
increase in labor
productivity

OVER
99.8%
inventory accuracy

30%
increased throughput

35%
reduction in storage,
labor and special
handling costs

Key Benefits:

WarehouseExpert™ offers unparalleled speed-to-pivot, with our rapid deployment methodology allowing customers to see ROI faster, flexing and scaling easily to meet ever-changing customer needs.

- Maximum ROI by improving inventory accuracy, maximizing space utilization, and streamlining work flows.
- Adaptable for changing needs – flexible architecture that leverages modular components that adapt to your present and future inventory models and business processes.
- Fit with your existing tech stack for seamless, proven integration.
- Faster Time to Value with powerful implementation tools that enable fast and low-risk delivery, code-free modifications and streamlined, affordable upgrades.
- Superior inventory control enables real-time visibility and accuracy in the warehouse and across the entire supply chain, including complete automated traceability.
- Ability to perform floor operations faster by optimizing processes, personnel and MHE.
- Increase customer service levels with system-directed process control and workflows to pick fast, ship fast for on-time, accurate delivery.

MADE4NET

is a leading global provider of best-in-class, cloud-based supply chain execution and warehouse management software for organizations of all sizes to improve the speed and efficiency of their supply chain. The company's end-to-end SCEExpert™ platform is adaptable, configurable and scalable to provide maximum Speed-to-Pivot™ for ever-changing supply chains. Made4net solutions provide real-time inventory visibility, labor management, and equipment productivity with performance analytics that drive faster, more accurate order fulfillment and improved throughput. In addition to their industry renowned WarehouseExpert WMS, the platform offers modular components like integrated yard management, dynamic route management, proof of delivery and warehouse automation solutions that deliver true supply chain convergence.
