

## Advance Your Horizons

Also a member of the Shoppa's family of businesses, Advanced Intralogistics is our strategic partner for the design, engineering, implementation, service, and support of our intralogistics solutions. Our relationship with Advanced Intralogistics enables us to provide intralogistics sales and support to companies across North America.

Advanced Intralogistics takes a brand-agnostic approach to your specific supply chain challenges and addresses them with our trusted methodology, ensuring that your investment yields maximum operational results.

## Get More Out of Your Warehouse

### System Design & Engineering

Strategically engineered, customized systems that address your unique needs and achieve your desired results

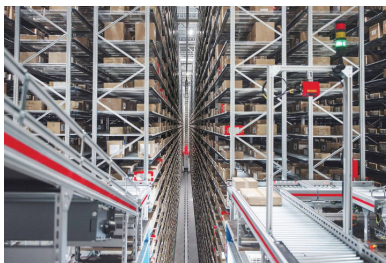

### Conveyor Systems

Flexible, durable systems for moving a variety of goods, increasing throughput, and generating faster fulfillment

### Sortation Systems

Customizable, high-tech solutions for diverting, transferring, and sorting packages throughout the order fulfillment process

### Automated Storage & Retrieval Systems (AS/RS)

Sophisticated solutions for efficiently managing a large inventory of stored items

### Robotics & AGVs

Innovative solutions for automating routine tasks while minimizing the risk of human error

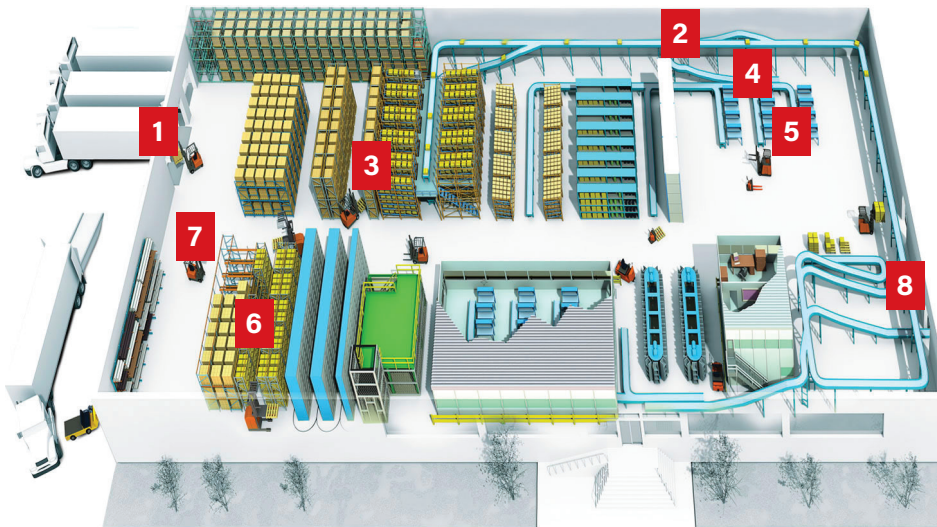

### Integrated Systems

Intelligent, connected systems that streamline your critical warehouse functions to maximize productivity and throughput

## Our Suppliers

Whether your warehouse or distribution center is large or small, we offer a complete suite of solutions to help you overcome challenges and get things done more efficiently. Our goal is to provide tailored solutions that help your entire operation.

| <b>3</b> Pick    | <b>7</b> Retrieve |
| <b>4</b> Sort    | <b>8</b> Ship     |

## Automation Service Capabilities

Automation requires regularly scheduled maintenance to ensure optimal performance and longevity. Our technicians do a full system inspection to check on all components within the system and report on what areas may need upcoming service. We offer maintenance intervals according to the manufacturer recommended schedule and operational needs such as:

- ▶ Component Replacements
- ▶ Equipment Troubleshooting
- ▶ Automation Equipment Software Updates
- ▶ Equipment Health Assessments
- ▶ Automation and Integrated Systems Installation
- ▶ Storage Systems Installation Services
